## GENERAL GUIDELINES/ALGEMENE RIGLYNE

### 1. CALCULATIONS/BEREKENINGE

- 1.1 **Marks will be awarded for:** correct formula, correct substitution, correct answer with unit.

**Punte sal toegeken word vir:** korrekte formule, korrekte substitusie, korrekte antwoord met eenheid.

- 1.2 **No marks** will be awarded if an **incorrect or inappropriate formula is used**, even though there are many relevant symbols and applicable substitutions.

**Geen punte sal toegeken word waar 'n verkeerde of ontoepaslike formule gebruik word nie, selfs al is daar relevante simbole en relevante substitusies.**

- 1.3 When an error is made during **substitution into a correct formula**, a mark will be awarded for the correct formula and for the correct substitutions, but **no further marks** will be given.

*Wanneer 'n fout gedurende **substitusie in 'n korrekte formule** began word, sal 'n punt vir die korrekte formule en vir korrekte substitusies toegeken word, maar **geen verdere punte** sal toegeken word nie.*

- 1.4 If **no formula** is given, but **all substitutions are correct**, a candidate will **forfeit one mark**.

*Indien **geen formule** gegee is nie, maar **al die substitusies is korrek**, verloor die kandidaat **een punt**.*

- 1.5 **No penalisation if zero substitutions are omitted** in calculations where **correct formula/principle** is correctly given.

*Geen penalisering indien **nulwaardes nie getoon** word nie in berekening waar die **formule/beginsel korrek gegee is nie**.*

- 1.6 Mathematical manipulations and change of subject of appropriate formulae carry no marks, but if a candidate starts off with the correct formula and then changes the subject of the formula incorrectly, marks will be awarded for the formula and correct substitutions. The mark for the incorrect numerical answer is forfeited.

*Wiskundige manipulasies en verandering van die onderwerp van toepaslike formules tel geen punte nie, maar indien 'n kandidaat met die korrekte formule begin en dan die onderwerp van die formule verkeerde verander, sal die punte vir die formule en korrekte substitusies toegeken word. Die punt vir die verkeerde numeriese antwoord word verbeur.*

- 1.7 Marks are only awarded for a formula if a **calculation has been attempted**, i.e. substitutions have been made or a numerical answer given.

*Punte word slegs vir 'n formule toegeken indien **'n poging tot 'n berekening aangewend** is, d.w.s. substitusies is gedoen of 'n numeriese antwoord is gegee.*

- 1.8 Marks can only be allocated for substitutions when values are substituted into formulae and not when listed before a calculation starts.

*Punte kan slegs toegeken word vir substitusies wanneer waardes in formule ingestel word en nie vir waardes wat voor 'n berekening gelys is nie.*

- 1.9 All calculations, when not specified in the question, must be done to a minimum of two decimal places.  
*Alle berekenings, wanneer nie in die vraag gespesifieer word nie, moet tot 'n minimum van twee desimale plekke gedoen word.*
- 1.10 If a final answer to a calculation is correct, full marks will not automatically be awarded. Markers will always ensure that the correct/appropriate formula is used and that workings, including substitutions, are correct.  
*Indien 'n finale antwoord van 'n berekening korrek is, sal volpunte nie outomaties toegeken word nie. Nasieners sal altyd verseker dat die korrekte/toepaslike formule gebruik word en dat bewerkings, insluitende substitusies korrek is.*
- 1.11 Questions where a series of calculations have to be made (e.g. a circuit diagram question) do not necessarily always have to follow the same order. FULL MARKS will be awarded provided it is a valid solution to the problem. However, any calculation that will not bring the candidate closer to the answer than the original data, will no count any marks.  
*Vrae waar 'n reeks berekeninge gedoen moet word (bv. 'n stroombaan-diagramvraag) hoef nie noodwendig dieselfde volgorde te hê nie. VOLPUNTE sal toegeken word op voorwaarde dat dit 'n geldige oplossing vir die probleem is. Enige berekening wat egter nie die kandidaat nader aan die antwoord as die oorspronklike data bring nie, sal geen punte tel nie.*

## 2. UNITS/EENHEDE

- 2.1 Candidates will only be penalised once for the repeated use of an incorrect unit **within a question**.  
*Kandidate sal slegs een keer gepenaliseer word vir die herhaalde gebruik van 'n verkeerde eenheid in 'n vraag.*
- 2.2 Units are only required in the final answer to a calculation.  
*Eenhede word slegs in die finale antwoord op 'n vraag verlang.*
- 2.3 Marks are only awarded for an answer, and not for a unit *per se*. Candidates will therefore forfeit the mark allocated for the answer in each of the following situations:
- Correct answer + wrong unit
  - Wrong answer + correct unit
  - Correct answer + no unit
- Punte sal slegs vir 'n antwoord en nie vir 'n eenheid per se toegeken word nie. Kandidate sal die punt vir die antwoord in die volgende gevalle verbeur:*
- Korrekte antwoord + verkeerde eenheid
  - Verkeerde antwoord + korrekte eenheid
  - Korrekte antwoord + geen eenheid
- 2.4 SI units must be used except in certain cases, e.g.  $V \cdot m^{-1}$  instead of  $N \cdot C^{-1}$ , and  $cm \cdot s^{-1}$  or  $km \cdot h^{-1}$  instead of  $m \cdot s^{-1}$  where the question warrants this.  
*SI eenhede moet gebruik word, behalwe in sekere gevalle, bv.  $V \cdot m^{-1}$  in plaas van  $N \cdot C^{-1}$ , en  $cm \cdot s^{-1}$  of  $km \cdot h^{-1}$  in plaas van  $m \cdot s^{-1}$  waar die vraag dit regverdig.*

### 3. GENERAL/ALGEMEEN

- 3.1 If one answer or calculation is required, but two are given by the candidate, only the first one will be marked, irrespective of which one is correct. If two answers are required, only the first two will be marked, etc.  
*Indien een antwoord of berekening verlang word, maar twee word deur die kandidaat gegee, sal slegs die eerste een nagesien word, ongeag watter een korrek is. Indien twee antwoorde verlang word, sal slegs die eerste twee nagesien word, ens.*
- 3.2 For marking purposes, alternative symbols (s, u, t etc) will also be accepted.  
*Vir nasiendoeleindes sal alternatiewe simbole (s, u, t ens) ook aanvaar word.*
- 3.3 Separate compound units with a multiplication dot, no a full stop, for example,  $m \cdot s^{-1}$ .  
 For marking purposes,  $m.s^{-1}$  and  $m/s$  will also be accepted.  
*Skei saamgestelde eenhede met 'n vermenigvuldigingspunt en nie met 'n punt nie, byvoorbeeld  $m \cdot s^{-1}$ . Vir nasiendoeleindes sal  $m.s^{-1}$  en  $m/s$  ook aanvaar word.*

### 4. POSITIVE MARKING/POSITIEWE NASIEN

Positive marking regarding calculations will be followed in the following cases:  
*Positiewe nasien met betrekking tot berekeninge sal in die volgende gevalle geld:*

- 4.1 **Subquestion to subquestion:** When a certain variable is calculated in one subquestion (e.g. 3.1) and needs to be substituted in another (3.2 or 3.3), e.g. if the answer for 3.1 is incorrect and is substituted correctly in 3.2 or 3.3, **full marks** are to be awarded for the subsequent subquestions.  
**Subvraag na subvraag:** *Wanneer 'n sekere veranderlike in een subvraag (bv. 3.1) bereken word en dan in 'n ander vervang moet word (3.2 of 3.3), bv. indien die antwoord vir 3.1 verkeerd is en word korrek in 3.2 of 3.3 vervang, word volpunte vir die daaropvolgende subvraag toegeken.*

- 4.2 **A multistep question in a subquestion:** If the candidate has to calculate, for example, current in die first step and gets it wrong due to a substitution error, the mark for the substitution and the final answer will be forfeited.

**'n Vraag met veelvuldige stappe in 'n subvraag:** *Indien 'n kandidaat bv. die stroom verkeerd bereken in 'n eerste stap as gevolg van 'n substitusiefout, verloor die kandidaat die punt vir die substitusie sowel as die finale antwoord.*

### 5. NEGATIVE MARKING/NEGATIEWE NASIEN

Normally an incorrect answer cannot be correctly motivated if based on a conceptual mistake. If the candidate is therefore required to motivate in QUESTION 3.2 the answer given in QUESTION 3.1, and 3.1 is incorrect, no marks can be awarded for QUESTION 3.2. However, if the answer for e.g. 3.1 is based on a calculation, the motivation for the incorrect answer could be considered.

*'n Verkeerde antwoord, indien dit op 'n konsepsuele fout gebaseer is, kan normaalweg nie korrek gemotiveer word nie. Indien 'n kandidaat gevra word om in VRAAG 3.2 die antwoord op VRAAG 3.1 te motiveer en 3.1 is verkeerd, kan geen punte vir VRAAG 3.2 toegeken word nie. Indien die antwoord op bv. 3.1 egter op 'n berekening gebaseer is, kan die motivering vir die verkeerde antwoord in 3.2 oorweeg word.*

**QUESTION/VRAAG 5**

- 5.1 Every body in the universe attracts every other body with a force that is directly proportional to the product of their masses ✓ and inversely proportional to the square of the distance between their centres. ✓  
Elke liggaam in die heelal trek elke ander liggaam aan met 'n krag wat direk eweredig aan die produk van hul massas en omgekeerde eweredig is aan die kwadraat van die afstand tussen hul middelpunte. (2)
- 5.2 Equal to/Gelyk aan ✓ (1)
- 5.3 When body A exerts a force on a body B, body B exerts a force of equal magnitude ✓ in the opposite direction ✓ on body A.  
Wanneer liggaam A 'n krag uitoefen op liggaam B, oefen liggaam B 'n krag van gelyke grootte in die teenoorgestelde rigting op liggaam A uit.

**OR/OF**

If body A exerts a force on object B, then body B exerts an equal ✓ and opposite force ✓ on body A.  
Indien liggaam A 'n krag uitoefen op liggaam B, dan sal liggaam B 'n gelyke maar teenoorgestelde krag op liggaam A uitoefen.

**Accept/Aanvaar:**

For every action, there is an equal ✓ and opposite reaction. ✓  
Vir elke aksie is daar 'n gelyke en teenoorgestelde reaksie.

**OR/OF**

Action and reaction are equal ✓ and opposite. ✓  
Aksie en reaksie is gelyk maar teenoorgesteld. (2)

- 5.4 Increase. ✓  $F_{\text{net}}$  is inversely proportional to the square of the distance between their centres. ✓ Acceleration is directly proportional to  $F_{\text{net}}$ . ✓  
Toeneem.  $F_{\text{net}}$  is omgekeerd eweredig aan die kwadraat van die afstand tussen hul middelpunte. Versnelling is direk eweredig aan  $F_{\text{net}}$ . (3)
